

Majic AI

AI consulting · private AI · the Majic Toolbox

REMOTE NATIONWIDE

On site in St. Louis and Kansas City

Prices in writing before work starts

A person approves everything it sends

AI that does real work for your business.

We set up AI for your team, connect it to the systems you already use, and build the missing pieces from parts already running in our own companies.

WHY MAJIC

Start with a pilot

One team and one job, measured before anything bigger.

Your data stays yours

Business AI accounts, or a private AI server in your own building.

Built from working parts

Every build starts from tools we already run every day.

A person approves

Nothing is sent, paid or changed without your OK.

Two senior builders

The people who build it support it. No ticket queue.

WHAT WE DO

- **AI pilot**
One job for one team, with today's number as the baseline
- **AI policy and security review**
A plain-words staff policy, access by role, requests logged
- **Training by role**
Your people taught on their own work, and recorded
- **The night shift**
Overnight reading, checking and drafting, ready by morning
- **Systems connected**
Your CRM, email, accounting and files behind one assistant
- **Private AI server**
AI that runs in your building, for the data that can't leave
- **Custom tools**
Web apps and automations for the jobs you name
- **Support**
Updates, fixes and new jobs as your use grows

Read-only connections first. Nothing is sent, paid or changed without a person's OK.

HOW WE START

- **A 30-minute call** on the job you want done
- **A pilot** on that one job, measured against today
- **Your numbers**, before and after, in writing
- **Then you decide** what comes next

OUR PROMISES

- **Prices in writing** before any work starts
- **What we build is yours**, and so is your data
- **Calls returned within two hours**
- **A person approves** everything it sends

THE MAJIC TOOLBOX

Every part at appmajic.ai/toolbox
